SUMMARY

Software Developer with technical proficiency in Flutter, Dart, Node.js, TypeScript, Python, and Firebase. Specializes in building cross-platform mobile applications, optimizing REST API endpoints, real-time database synchronization, and Docker containerization. Proficient in Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, and AWS cloud infrastructure.

SKILLS

Languages	Dart, Java, Python, C, JavaScript, TypeScript, SQL, HTML5, CSS3
Frameworks & Mobile	Flutter, Provider, BLoC, Node.js, Express.js, REST APIs, Firebase (Auth, Firestore, Cloud Functions)
Databases & DevOps	MongoDB, MySQL, Firebase Firestore, DynamoDB, Redis, Docker, AWS (EC2, S3, IAM, Lambda), Kafka, Git

EXPERIENCE

- Software Developer Intern — THub** Jan 2025 – Present
- Architected 4 production-grade mobile and backend modules utilizing Flutter, Node.js, and REST APIs, scaling application capacity to 500+ active users.
 - Implemented Firebase Authentication and Firestore real-time listener pipelines, slashing login and sync latency by 30%.
 - Engineered 6 modular UI and utility components, accelerating new feature development velocity by 25%.
 - Maintained a 95% sprint delivery compliance rate within an Agile team of 5 engineers using Git version control workflows.
 - Debugged 40+ production edge cases across HTTP API integrations and local state models, lowering overall crash rates by 20%.

PROJECTS

- Cross-Platform Mobile Application (ad-rep)** | *Flutter, Dart, Provider/BLoC* [🐙 GitHub](#)
- Architected responsive cross-platform Flutter UI matching Material Design 3 specifications using BLoC and Provider state management patterns.
 - Implemented HTTP REST API connection handlers with token refresh mechanisms, achieving sub-150ms request handling and zero token leaks.
 - Standardized 8 reusable stateful UI widgets, eliminating 30% of redundant code across mobile screens and improving maintainability.

- Distributed Messaging Benchmark Platform** | *Node.js, Apache Kafka, RabbitMQ, Docker* [🐙 GitHub](#)
- Benchmarked Apache Kafka against RabbitMQ across 5 distinct workload profiles and 3 message payload sizes.
 - Discovered a 35% throughput advantage for Kafka under high-concurrency event-streaming workloads.
 - Containerized microservice deployment with Docker, cutting local environment setup overhead by 50% across 1,000+ test runs.

- Collaborative Document Store** | *MongoDB, Docker, REST APIs* [🐙 GitHub](#)
- Built a document management backend indexing 10,000+ records with version control and full-text search capability.
 - Enforced optimistic concurrency control models, decreasing document edit conflicts by 90% during concurrent writes.
 - Designed 8 RESTful CRUD API endpoints achieving sub-200ms average response latency under benchmark testing.

- Dockerized Two-Factor Authentication Service** | *Docker, RSA Encryption, TOTP* [🐙 GitHub](#)
- Deployed a security microservice leveraging RSA encryption and TOTP tokens, validated against 500+ simulated auth attempts.
 - Containerized service artifacts using Docker, reducing deployment time from 15 minutes down to 2 minutes.
 - Achieved 100% compliance on internal penetration test scenarios for key management and endpoint authorization.

EDUCATION

- B.Tech in Computer Science & Engineering** Aditya College of Engineering and Technology, Kakinada Expected May 2027
- CGPA:** 7.97 / 10.0 | **Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Certifications** Google Cloud Associate Cloud Engineer, Full Stack Development with Flutter, C Programming (Cisco)
- Leadership** Technical Event Coordinator: Spearheaded technical project presentation for 150+ participants; led a team of 7 volunteers.
